Dear Parent/Carer

In association with The Northumbria Alcohol Intervention Project which is endorsed by Northumberland County Council, your child will take part in an Alcohol Awareness Session this term that will be delivered by our school. We feel this is an important session which will support the health, social and emotional development of your child, and aid them in making good decisions during adolescence.

All material delivered will be age appropriate and will emphasise the importance of having an alcohol free childhood. The focus of this session will be on the health and social impacts alcohol can have during consumption as well as taking the opportunity to discuss the law in relation to underage drinking. We believe this is important to cover, as our school feels that information and knowledge will help your child make informed choices in life, which enables them to stay safe and live a healthy, fulfilling life.

Parents and carers can work with us to raise awareness about not drinking alcohol during childhood by having conversations at home. To support you in these conversations and to give age appropriate information, we have created an online resource for more information and guidance which we recommend visiting via the following link: <http://www.northumberland.gov.uk/wrekd/parents>

We hope that you support us in the social education of your child and that we can work together to help your child continue to enjoy a happy and healthy life.

Yours faithfully,
